BIREL ART

Tradition and Innovation

We represent a company where tradition and innovation come together every day to feed the legend of the Birel ART brand. Our plus is the ability to combine the development of advanced technological solutions with the craftsmanship and experience that distinguishes us.

Passion and Excellence

The passion for motorsport is the sap that drives us to set ambitious goals to satisfy our customers. We are always in step with the times, curious and open to new things to grow our skills and offer excellence.

Individual and team

Our company is a big family with a strong sense of belonging, human resources are very important for us and ours is a team where competence and passion always go hand in hand.

Emotion

Birel ART - for more than 60 years we have continued the passion for a sport that has formed and continues to train all the F1 drivers. With heart, pride and enthusiasm we keep alive the passion for the racing world and allow all those who love the thrill of driving to be able to do it in great safety and at high technical levels and performances.

« For those who like racing, I advise the karting
and to do it with love and dedication. »
Ayrton Senna - December /1982

MOTOR LOAD CHARACTERISTIC CURVE

TRACK SIDE MONITORING SYSTEM

DE HAARDT

The speeds can be set very precisely for each track environment, ensuring safe and secure operation. The Xtra.CAN and EV Transponder are compatible with all the major timing systems.

REMOTE CONTROL

TRANSPONDER

MINI REMOTE CONTROL

XTRA.BLACK BOX

by DE-HAARDT

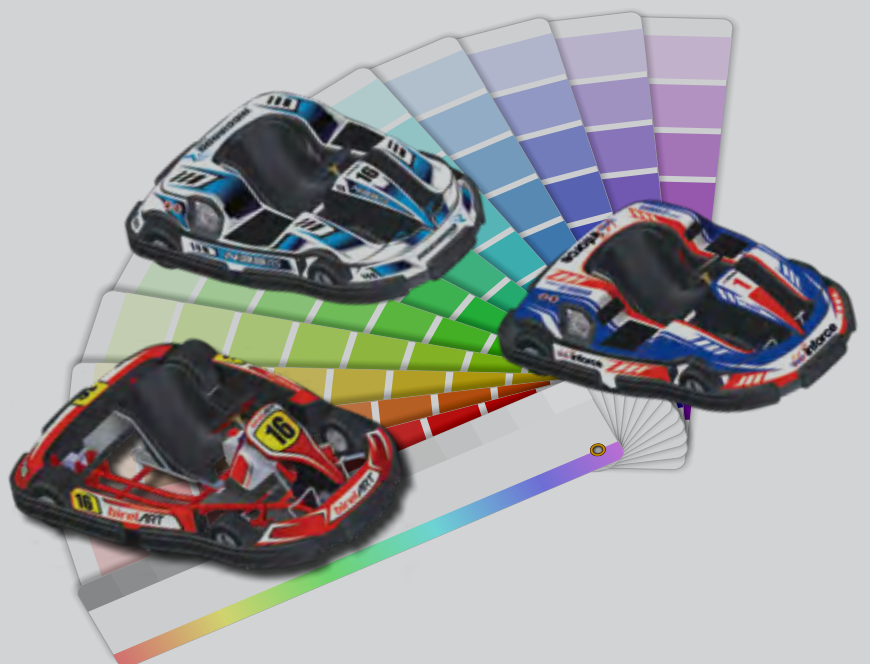

- A true "Black Box" adding many features to your De Haardt system and your go-kart track.
- The Xtra.Black Box has two antennas for two separate radio channels that can be used simultaneously. One channel for safety or timing messages (not at the same time) and the other one for CAN information.
- The power supply and connection to your go-kart track software is done through the ethernet connector. A 5 meter ethernet cable with an IP65 connector and Power-over-Ethernet injector are included.
- The Xtra.Black Box is a replacement for the Xtra.Range Extender and the Xtra.Timing Host.
